DETAILED ACTION
EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Charles Prescott on 10/21/04.

The application has been amended as follows:

Claim 8, line 16 of page 3 has been amended to read:

"said handle being hollow—along substantially the entire length thereof—and of sufficient airtight interior air volume to render said fish gaff substantially buoyant in water."

Claim 11, line 2, page 5:

The term "STYRAFOAM" has been replaced with --foam material--.

The following is an examiner's statement of reasons for allowance: the prior art of record, including the previously cited Le Febvre et al. and Bovino references, do not disclose the combination of features in the immediate application including an elongated handle which is substantially hollow along its entire length, has a gripping portion which extends arcuately away from the main portion, and a shank portion which is positionable in a plurality of positions about the longitudinal axis of the device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bethany L. Griles whose telephone number is 703.305.1839. The examiner can normally be reached on Monday through Friday 8:00 am - 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter M. Poon can be reached on 703.308.2574. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
